De Vroomen Garden Products  
“Celebrating 100 years and still Growing”

As we celebrate our 100th year in business, we reflect on the journey that has brought us here. The ‘De Vroomen’ family, who has owned and operated the company since its founding, takes immense pride in being a leader in the flower bulb and perennial industry. Rooted in history, our story began in the 1920s when our founder, Grandpa Jac.th. De Vroomen, started with humble beginnings and built a successful bulb growing and exporting company. Our growth has always been driven by a commitment to quality, punctual delivery, authenticity, and a willingness to embrace innovation. In the 1950s, the reins of the business were passed on to his three sons, Hugo, Ben, and Dick, who continued to expand the business. We have consistently invested in enhancing our product line, maintaining our high standards, and increasing our market share. In 2014, we introduced the Simple Pleasure brand for our independent garden center line. Our expansion continued with the acquisition of a well-established perennial and flower bulb company in Canada. This has enabled us to enhance and broaden our grower, landscape, and independent garden center line with a wider range of products and services.

De Vroomen USA recently relocated to a spacious 80,000 sq ft facility in Gurnee, IL. This move provides us with ample room for the growth we are experiencing and allows us to store our products at the optimal temperature. Our commitment to a business plan that focuses on development, investments, research, and flexible production has proven to be a successful model for us. We strive to be a long-term partner to all our customers and suppliers.

Guide for estimating quantity of bulbs needed

This guide is a reference only, for more intense displays or beds that will be mostly viewed from a short distance, adding more bulbs per square foot (perhaps even doubling the amount) is recommended.

**Square or rectangular beds:**  
width x length x number of bulbs per square foot  
= number of bulbs needed to fill space.

**Round beds:**  
radius<sup>2</sup> (1/2 diameter of the circle<sup>2</sup>) x 3.14  
x number of bulbs per square foot  
= number of bulbs needed to fill space.

Guide for estimating quantity of bulbs needed

This guide is a reference only, for more intense displays or beds that will be mostly viewed from a short distance, adding more bulbs per square foot (perhaps even doubling the amount) is recommended.

Square or rectangular beds:

width x length x number of bulbs per square foot  
= number of bulbs needed to fill space.

Round beds:

radius<sup>2</sup> (1/2 diameter of the circle<sup>2</sup>) x 3.14  
x number of bulbs per square foot  
= number of bulbs needed to fill space.

# Why De Vroomen Garden Products?

## A broad and deep collection of proven landscape varieties

The De Vroomen Garden Joy landscape program consists of 250+ carefully selected varieties. Tulips and Daffodils are by far the most popular varieties in our landscape line-up but at De Vroomen Garden Products we also offer a large variety of specialty bulbs. Varieties like Allium, Scilla and Fritillaria are becoming more popular because they will offer your customers a special and different landscape display. Please contact us with any special requests for items that are not listed in our catalog. We will be glad to source the varieties you need.

### Premium Bulb Sizes

We offer our bulbs in different sizes, but overall, we focus on bigger, premium bulbs. The bigger the bulb the better the result and at De Vroomen quality comes first. Bulbs are measured by their circumference in centimeters. For instance, a bag of 12/ + cm tulips consists of bulbs with a circumference of 12 cm or larger.

### Packing and delivery by job name

We can pack your orders by job name. Just send in a PO per project and you will receive your bulbs packed accordingly. This will save you a lot of time and money sorting out your delivery. We pack our bulbs in mesh landscape bags. Each bag has the variety, size and amount of bulbs imprinted. We also register the production number which allows us to track each bag of bulbs back to the grower. A valuable instrument to increase quality year after year.

## Production and Quality Control

Everyone at our company will make sure we provide you with the best possible quality flower bulbs. De Vroomen Garden Products is known for delivering healthy, true-to-name and true size products. Because De Vroomen takes quality seriously, we are a member of the Holland Selection organization. Being a member of this organization, we guarantee:

- the highest quality flower bulbs;
- supreme flowering, provided the instructions on the package are followed;
- healthy bulbs upon delivery;
- that the variety, color and size of the bulbs agree with what is stated in our catalog;
- proper handling of customer complaints;
- tracking and tracing from grower to consumer in order to improve our quality and customer service.

Our products are packed in a state of the art production facility in Lisse, Holland. The independent Dutch Flowerbulb Inspection Service conducts inspections during the production process and thereafter. As well as using independent inspectors, we also have our own staff members to monitor quality, packing of your bulbs and paperwork. They use modern scanning technology for early detection of diseased bulbs, special counting and packing machines for premium packing and a professional logistical system for order picking.

Nothing brings attention to commercial signage and properties like spring bulbs. When the world around us is drab and dreary, bulbs act like a laser light to focus people's attention to that signage your customers paid so much money for to attract attention.

**Yes, as it increases visibility,  
it will  
increase your profits!**
